

# Space Crosswords

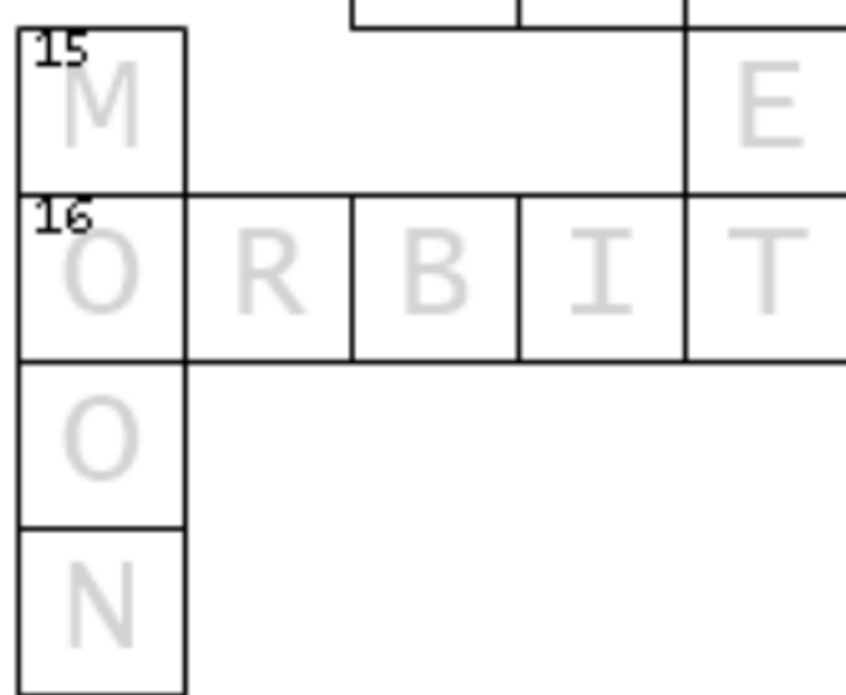

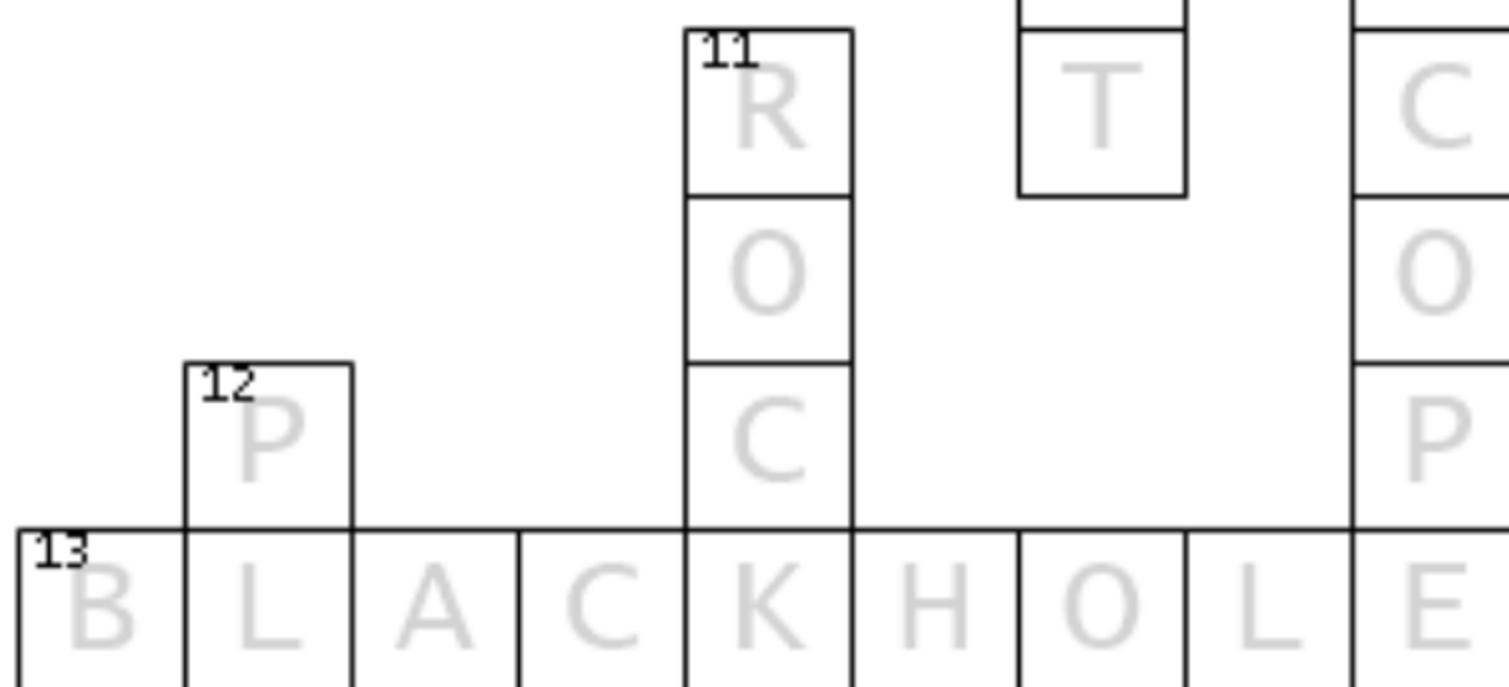

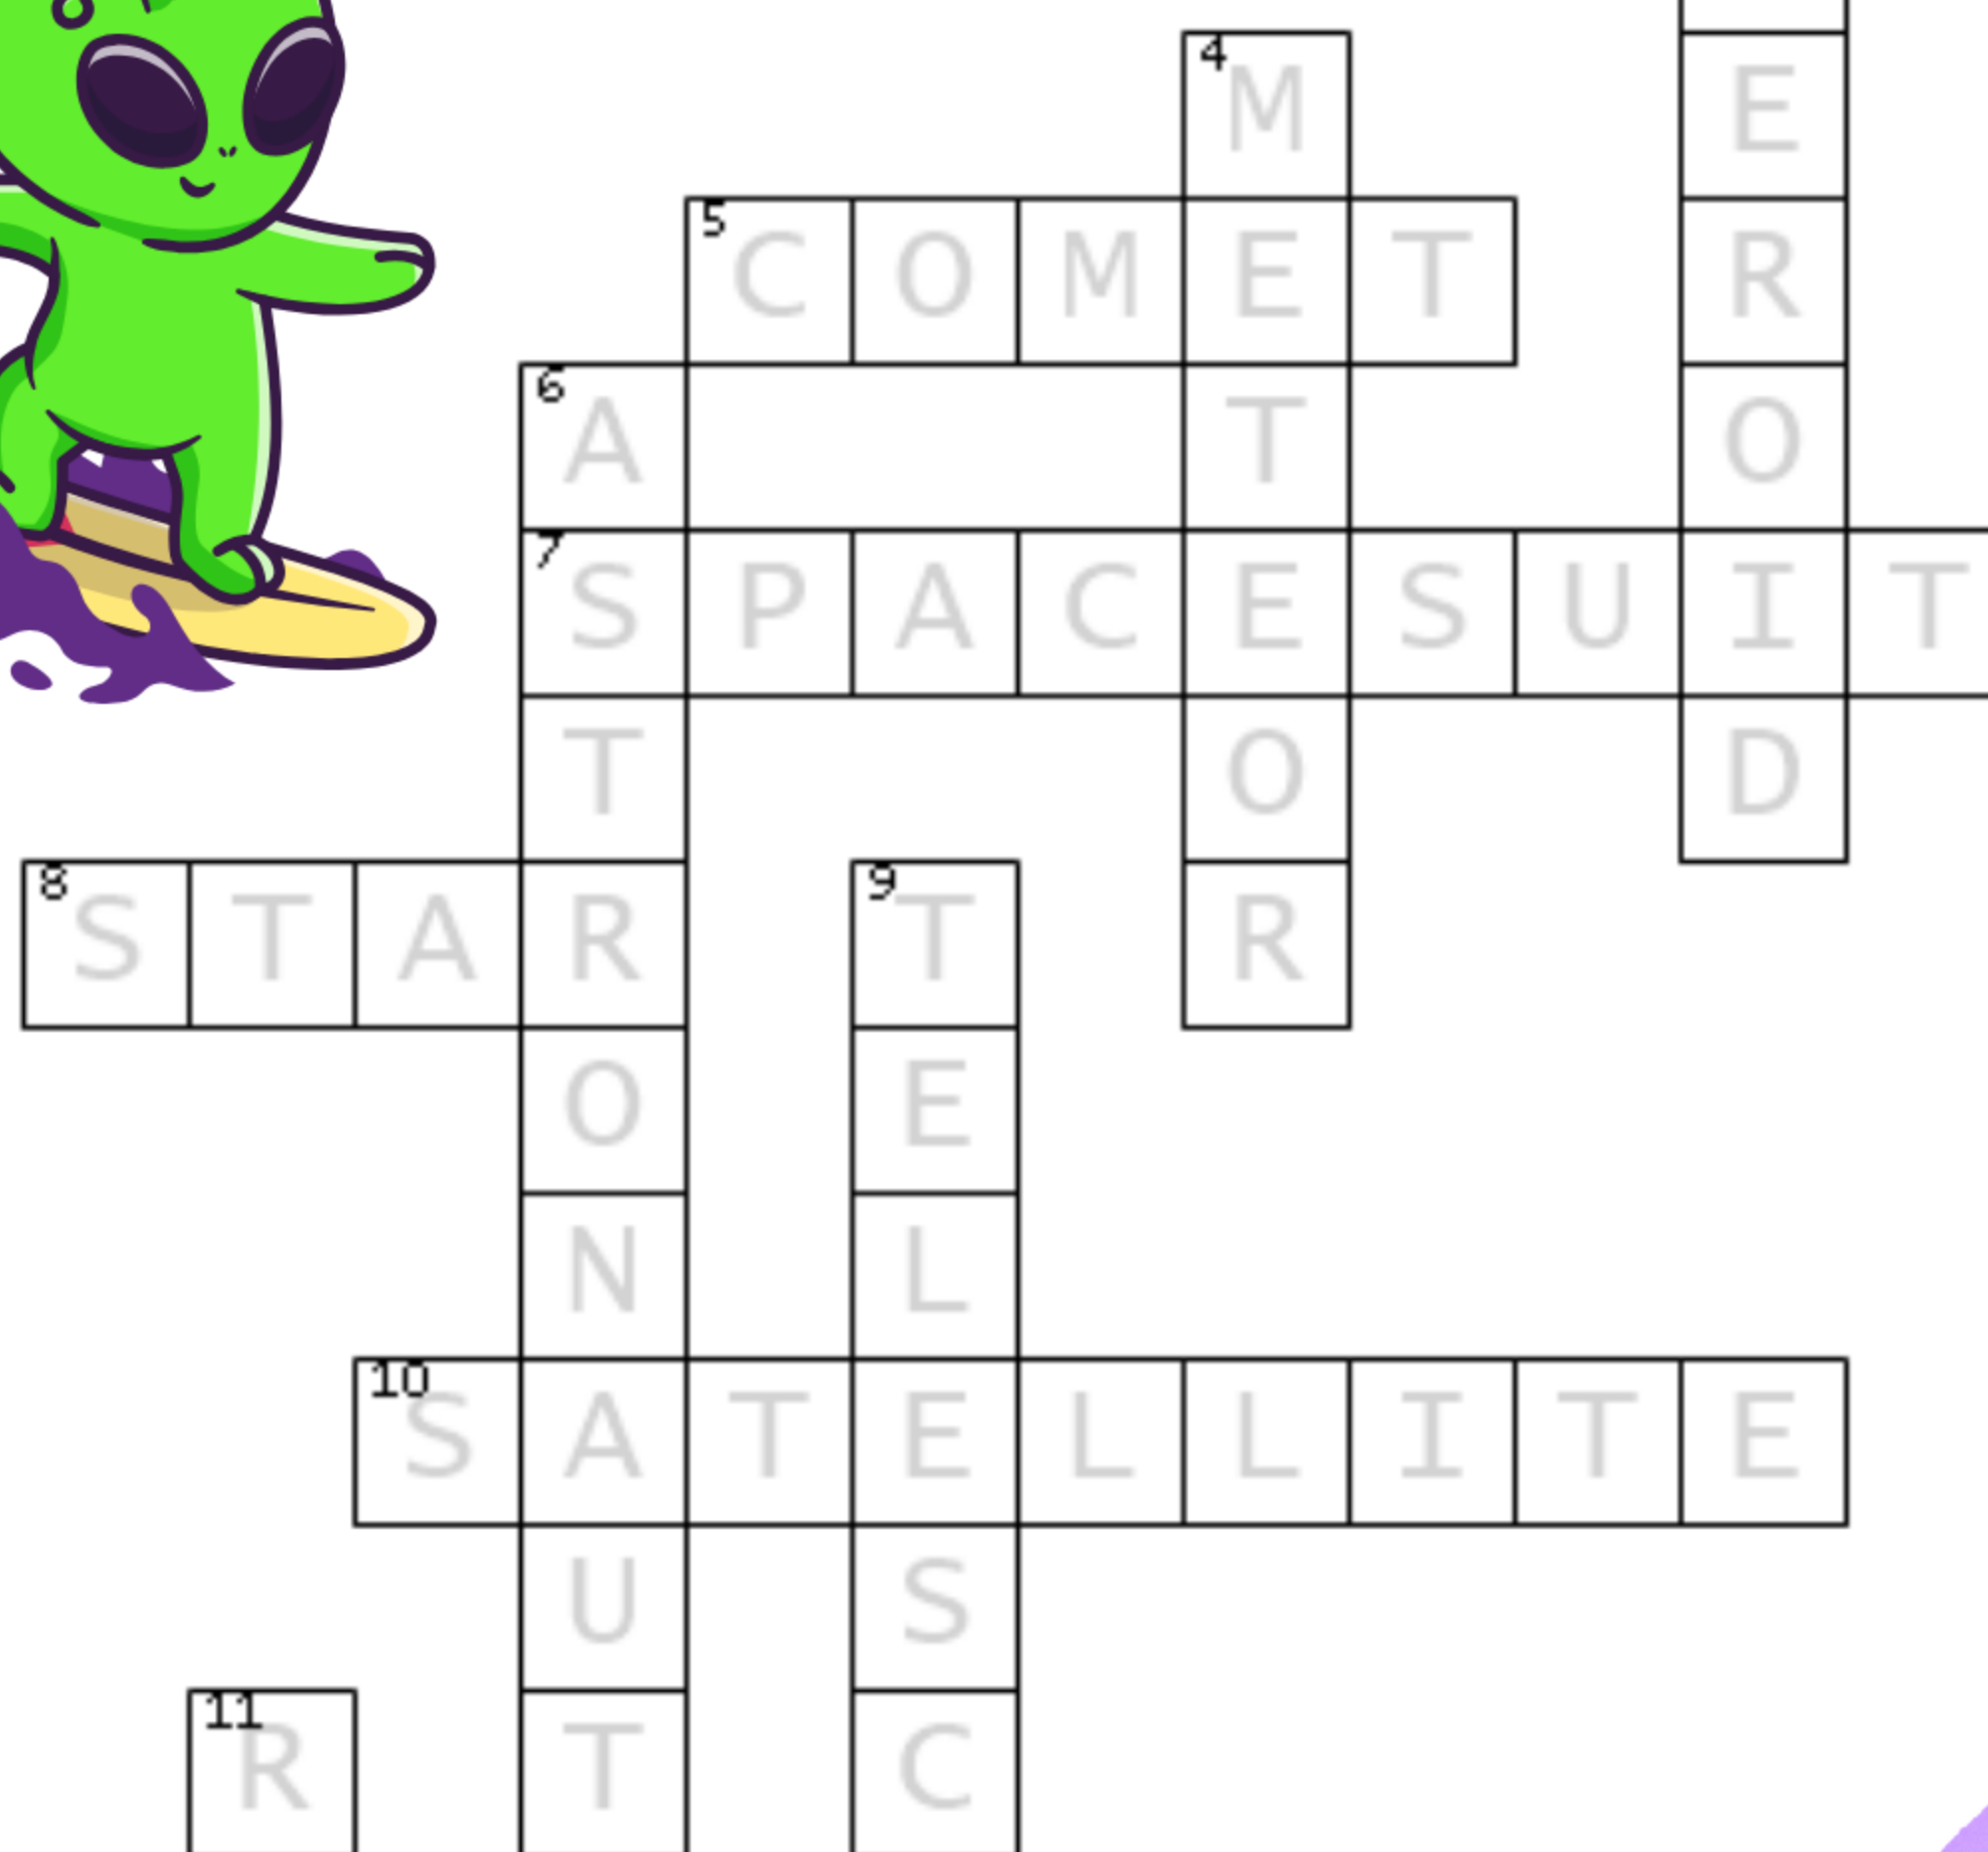

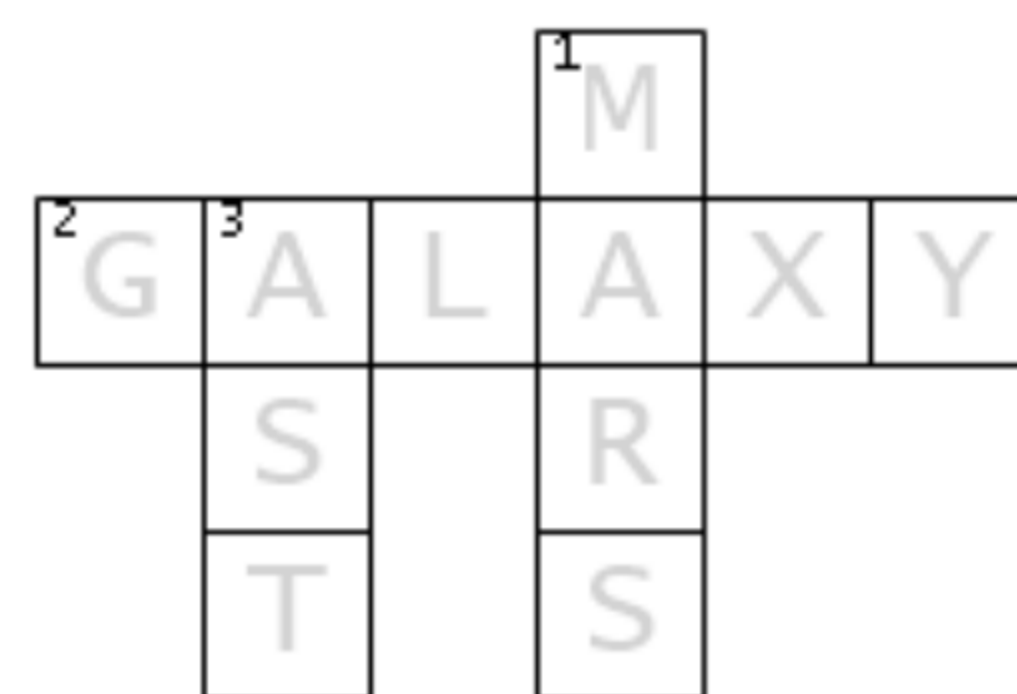

## DOWN

1. Known as the "Red Planet" in our solar system.
3. A rocky object that orbits the sun, smaller than a planet.
4. A small piece of rock that burns up as it enters Earth's atmosphere.
6. A person who travels to space.
9. A tool used to look at stars and planets.
11. A spacecraft used to travel to space.
12. A large object that orbits a star, like Earth.
15. A natural satellite that orbits a planet.

## ACROSS

2. A large system of stars, gas, and dust, like the Milky Way.
5. A ball of ice and dust that orbits the sun and has a tail.
7. The protective clothing astronauts wear in space.
8. A bright, burning ball of gas in the night sky.
10. An object that orbits a planet, either natural or manmade.
13. A space object with gravity so strong, not even light can escape.
14. The star at the center of our solar system.
16. The path an object takes around a star or planet.
